Moderate

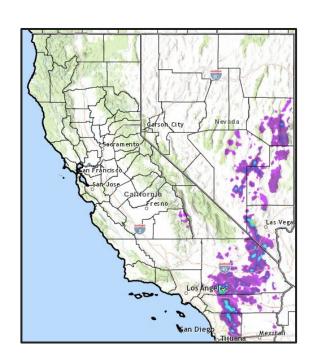

Major

Minor

- Scattered showers and thunderstorms are expected across much of Southern California into the Sierra through Friday
 - Some storms will be capable of producing locally heavy rainfall and flash flooding, especially across the southern mountains and deserts again today where a Flood Watch is in effect
- Very warm temperatures will continue for many inland areas through Friday, bringing moderate heat impacts, with a gradual cooling trend for the weekend
 - The warmest temperatures are expected across the Central Valley and interior Southern
 California with daytime high temperatures of 98 to 108 degrees
- Winds across the mountains and foothills will remain breezy most afternoons through the middle of next week, bringing locally elevated fire weather conditions

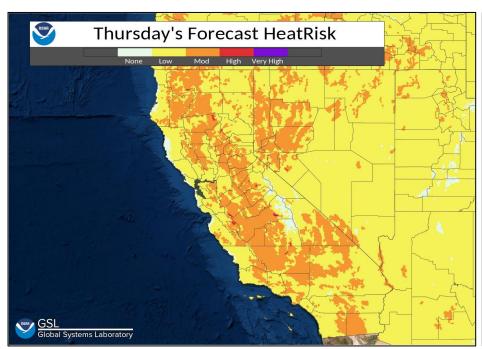

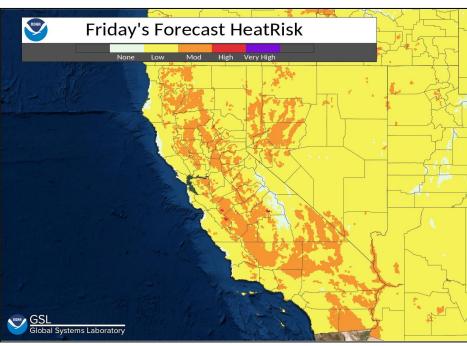

Thursday Friday Saturday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

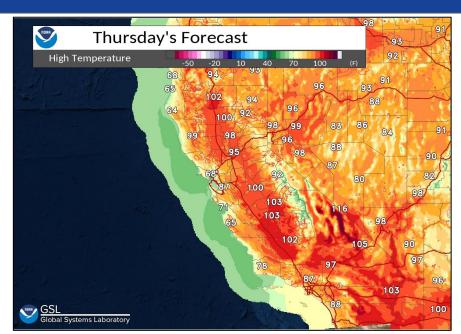

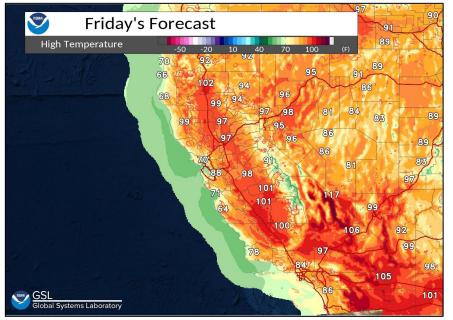

Green	Level 0	No Elevated Risk
Yellow	Level 1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration
Orange	Level 2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration

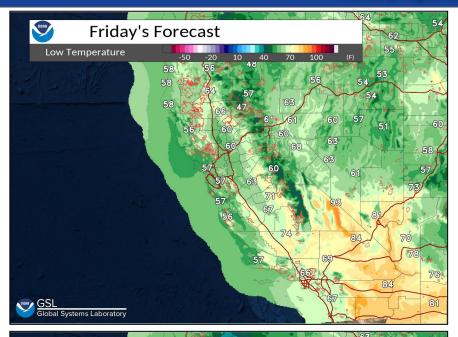

Red	Level 3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Magenta	Level 4	Very High Risk for the entire population due to long duration heat, with little to no relief overnight

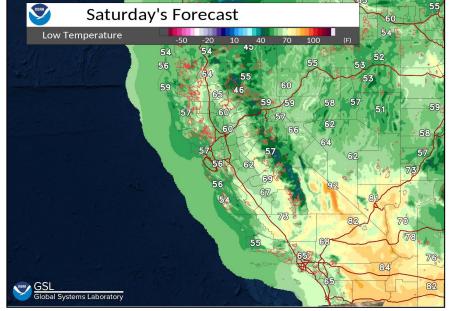

Thu-Fri High/Low Temperatures

Weather Outlook (6-14 Days)

Regional Operations Center
Western Region
Thursday, August 25

6-10 Day Outlook (August 30 - September 3)

Temperatures

• Above normal temperatures continue to be favored statewide

Precipitation

Near normal precipitation is favored statewide

8-14 Day Outlook (September 1 – September 7)

Temperatures

Above normal temperatures continue to be favored statewide

Precipitation

Near normal precipitation is favored statewide

Risk Assessment Matrix

Impact Level Definition

- 1. Impactful weather is not expected.
- 2. Potential threat to lives and property if no/incorrect actions are taken.
 - a. Localized impacts on commerce possible.
 - b. Includes events that occur frequently.
- 3. Potential threat to lives and property if no/incorrect actions are taken.
 - a. Impacts on commerce possible.
 - Includes events that occur a few times per year.
- 4. Actions likely needed to save lives and/or property.
 - a. Significant impacts to commerce possible.
 - b. Includes events that occur infrequently.
- 5. Actions required to save lives and/or property.
 - a. Significant and extended impacts to commerce.
 - b. Includes exceptionally rare events.
